# Logistics / VMI Inventory Management

## Secure Consistent Supply for Your Customers

We understand the complexities of a global supply chain. We also realize that end customers are demanding shorter and shorter lead times. With VMI, AC Photonics can monitor stocking and sell-through positions, triggering replenishment orders within your defined thresholds and eliminating delays.

## Efficient Shipping Around the World

With warehouse locations in California and Asia, AC Photonics provides maximum responsiveness and efficient, economic logistics for clients around the world.

## Seamless Operation

Our experience in logistics allows our parts to freely flow across borders without any issues and with JIT integration, we empower you to operate at nominal inventory levels, confident that AC Photonics can deliver what you need on time, when needed.
